## OBJECTIVE

---

Results-oriented professional with expertise in both QA and UX in search of a role in which I can provide a meaningful contribution to an organization's product development team. I bring a natural empathy for others, and strong ability to communicate and uncover issues within a software product. I hope to expand my talents with a company that prioritizes the user's experience.

## EDUCATION

---

KENT STATE UNIVERSITY	KENT, OH
<b>Master of Science in User Experience Design</b>	<b>May 2018</b>
<ul style="list-style-type: none"><li>Graduated with a 4.0 GPA</li></ul>	

BOWLING GREEN STATE UNIVERSITY	BOWLING GREEN, OH
<b>Bachelors of Science in Education</b>	<b>December 2001</b>
<ul style="list-style-type: none"><li>Major: Athletic Training and Clinic Management</li></ul>	

## SKILLS

---

My UX coursework and experience has provided a solid foundation in:

- |                                                                                                                                                                                                                                |                                                                                                                                                        |

## PROFESSIONAL EXPERIENCE

---

TEAMSNAPE	REMOTE
<b>Quality Assurance Tester</b>	<b>February 2020-May 2020</b>
<b>Jr Quality Assurance Tester</b>	<b>June 2019-January 2020</b>
<ul style="list-style-type: none"><li>Wrote and executed manual test cases and executed test scripts.</li><li>Evaluated new and existing features for UX, UI, and accessibility related issues.</li><li>Created and managed testing documentation in Confluence and Jira.</li><li>Identified and made recommendations for new areas where automated testing would be a benefit.</li><li>Ran automated tests in Ghost Inspector as a second means of identifying regressions within the product.</li><li>Collaborated with the product team to identify potential risks and identify requirements for new product features.</li><li>Identified and reported bugs within new and existing features. Worked with developers, subject matter experts, and project managers to assess the timeframe for fixing bugs, and evaluated the risk of deploying bugs into the production environment when necessary.</li></ul>	

- Collaborated with the QA and project teams to improve processes, documentation, and workflows.
- Established strong relationships with developers, designers, and project managers to create a cohesive team atmosphere.
- Provided UX expertise in regards to user testing, UI changes, and user flows for new features when necessary.

#### KENAN ADVANTAGE GROUP

CANTON, OH

##### Contract UX Designer

**December 2018-May 2019**

- Worked in an agile environment to redesign the software product users utilized to order fuel products.
- Collaborated with the product design team to evaluate the current product and determine what changes should be made to improve the usability of the software.
- Interviewed internal stakeholders about product functionality and user behaviors during the fuel ordering process to gain a stronger understanding of user behaviors and needs.
- Produced wireframes for the new product screens in Figma.
- Developed interview and usability testing documentation, including screeners, test scripts, and post-test questionnaires to evaluate the new designs.
- Performed product demonstrations within the product team, and upper management to elicit business stakeholder feedback continually throughout the design sprints.
- Participated in exploratory testing on new software applications as needed.

#### HONEYBEEBASE

CANTON, OH

##### Contract UX Designer

**November 2017-March 2018**

- Performed a review of the software onboarding process, as well as, specific tasks within the software to assess for issues within the design of the user interface.
- Recruited users for interviews to uncover their needs and desires in the functionality of the software and its use.
- Facilitated remote usability testing with the recruited users and reported the findings along with recommendations for changes to the software to improve the design and use for the user.

## SOFTWARE EXPERIENCE

---

Throughout graduate school and professionally I have utilized the following software:

Confluence, Jira, Figma, Mockflow, Validately, Proto.io, Treejack, Chalkmark, Invision, Axure, Balsamiq, Screencast-O-Matic
